

Greetings from the HOPE Project!
Thanks to your support, we've begun the year strong.
Here's what we have accomplished so far in 2022.

Expansion Of Our Computer Classroom

We added eight computers to our St. Joseph Workshop computer classroom - bringing the total number of student computers to twelve. This is a huge improvement as more students can now use the digital learning content at the same time. We also added a large screen TV for classroom instruction.

New Backpacks

We gave out backpacks to all our high school and college students. Many students previously had to resort to using shopping bags to carry their books and supplies to and from school.

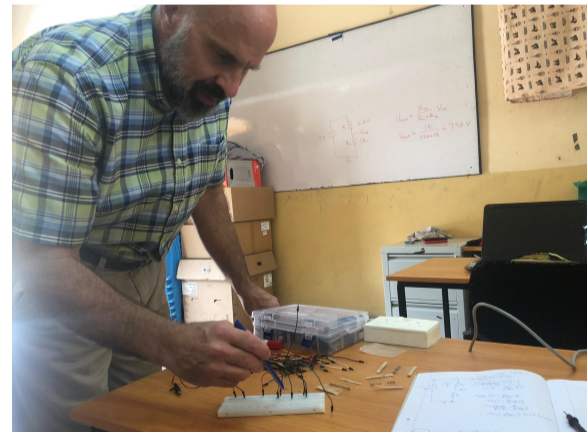

More Than Just Traditional School Supplies

In addition to the standard school supplies that we provide to our primary and high school students, we also furnish materials to our vocational school students such as boots for welding and material to make clothes for those studying tailoring. (A dress is modeled by the student who made it in the picture below.)

Incorporating More Hands-on Learning

We strive to provide hands-on experiences for our students to help them better learn and understand the subjects they are studying. As a few students are studying electronics, we purchased some basic electronic components for the students to use to build circuits.

Feeding Those Who Need Our Help

We continue to provide much needed bags of food, which include flour, beans, oil and milk, to families each month. The food we supply does a lot to keep our students and their families from going hungry.

New Uniforms And Shoes For The New Year

All of our students received new uniforms and shoes for the new school year. Many students had outgrown their old uniforms and some uniforms were just worn out.

Having Fun

To celebrate the end of the 2021 school year, which was delayed by over two months due to COVID school closures, we had a movie and fun day with lots of food, snacks and candy.

Help us to continue to serve these vulnerable children. We have great plans for the remainder of the year, but can't make them happen without your support. Join our team and donate now. May God bless you for your generosity!
