

We are off to a great start in 2025. We have already brought 10 new students into the HOPE Project so far this year. We not only paid school fees for over 220 students, but also provided each of them with new uniforms, shoes, and school supplies. We opened a second location on the other side of town, with an office and classrooms, to better serve the children who live in that part of town. We continued to give out food each month to 50 needy families, provided 10 beds and mattresses to families who were sleeping on the ground, and rebuilt the collapsing home of one family. We ran weekly tutorial sessions for our students across two locations and completely restocked our library of textbooks to align with the new academic curriculum in Kenya.

Opening of a Second HOPE Project Location

In January, we opened a second location on the other side of town consisting of an office and classrooms. This new location enables us to better serve the children and their families who live on that side of town. We are now holding office hours and running tutorial sessions in two locations – our primary office and this new location.

A New Home for Isaack and Jacob

Nema is 43 years old. Her husband passed away 11 years ago. She is raising two young sons on her own. Isaack is 14 years old and in eighth grade. Jacob is 13 years old and in sixth grade. Nema washes clothes for a living to support her family but has been struggling with Tuberculosis the past three years. The family was living in a one room mud house that was collapsing. We demolished the collapsing house and rebuilt a new home for Nema and the two boys.

We have 10 new students that we began supporting in the first quarter. Most of these children are being raised by single mothers who are struggling to pay school fees. We accept new students into the HOPE Project based on need.

We gave out 10 beds and mattresses, along with sheets and pillows, to 10 of our students and their families. These families had no beds or mattresses and were sleeping on the ground.

We enrolled over 220 students in school for the first term of the 2025 school year, which began on January 6. We support students ranging from pre-primary through vocational school and college across more than 50 different schools.

We continue to distribute 50 bags of food each month to the families of our students. Most families would not survive without this help. We frequently also help families in emergency situations when they have not eaten in several days.

Every school and each grade has their own unique school supply requirements. Each student is required to have a specified number of very specific types of notebooks and other supplies. We provide our students with all the school supplies they need for school, including backpacks.

We give our students every opportunity to learn and improve in their academics. We now run weekly tutorial sessions across two locations, on Saturdays and during term breaks, where the students are tutored and have access to a wide range of learning materials.

After being forced to drop out of high school due to missing so many days because of health issues, Hannan is enrolled in a cosmetology program. She is now doing well, and we are thrilled that she is now able to pursue a certificate program. Because of the special circumstances and challenges she faces, we are supporting Hannan in boarding school.

While our students are pursuing certificates in school, we support them in internships at local businesses where they gain practical experience. We regularly visit the business where they are doing their internships to see how things are going.

We had a very busy and productive first quarter of 2025 and will continue to help our children flourish as we proceed through the year. We cannot do what we do without your support. Your generosity enables us to change the lives of children.
